MISSION C425C

31 JULY 1965

file

NPIC/R-284/65

AUGUST 1965

25X1

SECRET

GROUP 1 EXCLUDED FROM
AUTOMATIC DOWNGRADING
AND DECLASSIFICATION

25X1

Declassified in Part - Sanitized Copy Approved for Release 2012/01/09 : CIA-RDP89B00709R000100180014-4

WARNING

This document contains information affecting the national defense of the United States, within the meaning of Title 18, sections 793 and 794, of the U.S. Code, as amended. Its transmission or revelation of its contents to or receipt by an unauthorized person is prohibited by law.

PREFACE

This Mission Index (MI) lists the intelligence targets imaged on the photography of this mission.

Targets are arranged 1) by country, 2) within the country according to subject, 3) within the subject by WAC area, and 4) within the WAC area by geographic coordinates in ascending order. The map base used (when available) for the derivation of coordinates in the MI is the latest edition of the US Air Target Chart, Series 200.

The header line for each target contains, reading from left to right, the installation name, the geographic coordinates, the World Aeronautical Chart number (e.g. 0616), the Bombing Encyclopedia (BE) number (e.g. 00373), and the NPIC target number (e.g. 11A). The COMOR target number follows on the second line.

The photo reference data line contains the frame numbers (R/640--L/550), limiting conditions (e.g. H), photographic quality (e.g. F), photographic coverage (e.g. T), and the mode (e.g. ST).

The symbols for the limiting conditions affecting photography are C (clear), SC (scattered clouds), H (haze), CS (cloud shadow), HC (heavy clouds), SD (semidarkness), S (snow), and O (obliquity).

The quality of the photography is categorized as G (good), F (fair, or P (poor).

The extent of photographic coverage is denoted by T (total), PT (partial), or ID (identification only).

The mode of coverage is indicated by ST (stereo), MN (mono), or PST (partial stereo).

The word "new" preceding the photo reference data line indicates that the target is either a newly identified installation or a known installation which is being reported for the first time by NPIC. The word "change" indicates that a major change has been observed at a previously reported installation. These "new" and "change" targets will be described in a summary report.

For the convenience of the user, an index to all targets is included at the end of the report. Targets are arranged alphabetically within a country.

The user of this report is cautioned that the scan of photography was accomplished in a relatively short time and often without the aid of precise analytical and mensural techniques commonly employed in detailed photographic analysis. Consequently, additional, detailed analysis may somewhat alter or negate portions of the information.
